Career Objective

To secure an internship where I can apply my programming skills in C++, Java, and Python to build efficient software solutions while learning from industry experts.

Education

Degree	Institute	CGPA/%	Year
M.Tech (CSE)	Amrita Vishwa Vidyapeetham	7.2	2025–Present
B.Tech (Mechanical)	Audisankara College of Engg. & Tech.	8.65	2019–2023
Intermediate (MPC)	Viswasai Junior College, Nellore	8.69	2017–2019
SSC (10th)	Vowel Techlan School, Nellore	9.2	2016–2017

Relevant Coursework: Data Structures, Operating Systems, DBMS, Computer Networks, Object-Oriented Programming.

Experience

- **VSP Technologies** — Apr 2024 – Oct 2024
  Java Programming Intern — Hyderabad
  - –Developed and integrated REST APIs for internal application workflows using Spring Boot.
  - –Debugged production issues, optimized backend logic, and improved system stability.
  - –Collaborated using Git for version control and participated in agile sprint cycles.

Projects

- **Runtime Detection of LOTL Attacks in Kubernetes (Ongoing)**
  - –Designed a runtime monitoring framework to detect Living-Off-The-Land (LOTL) attacks in containerized environments.
  - –Analyzed Linux system call traces and process behavior using Python to identify anomalous command executions.
- **CareCart – Transactional Healthcare Management System**
  - –Designed normalized relational schema and ER diagrams for doctor-patient appointment workflows.
  - –Built MySQL database with referential integrity constraints, PL/SQL triggers, and stored procedures.
  - –Integrated backend using JDBC to handle concurrent transactional operations reliably.
- **Citizen Department Portal – Backend Module**
  - –Developed RESTful APIs for public complaint registration, status tracking, and department assignment.
  - –Integrated backend services with MySQL database for persistent record management.
- **Aptora – AI-Powered E-Learning Platform (NIT Kurukshetra Hackathon)**
  - –Built an intelligent learning platform that dynamically generates quizzes and study notes from raw text input using Google's Gemini API.
  - –Developed backend integration with Python and Node.js; validated AI-generated content for consistency.

Technical Skills

- **Programming:** C, C++, Java, Python
- **Backend:** Node.js, Spring Boot, REST APIs, JDBC
- **Databases:** MySQL, MongoDB, PL/SQL
- **Cloud & Containers:** Docker, Kubernetes (basics), AWS (basics)
- **Frontend:** HTML, CSS, JavaScript, React.js (basic)
- **Tools:** Git, GitHub, Linux (bash commands), Visual Studio (basic)
- **Core:** DSA, OS, DBMS, Computer Networks, OOP

Achievements

- Gold Medal for Academic Excellence in B.Tech (2023) – Top performer across all branches
- Hackathon Finalist – Techspardha (Excalibur), NIT Kurukshetra (2025)
- Selected Participant – IIIT Bangalore Hackathon (2025)

Certifications

- Data Structures & Algorithms in Java – Udemy (2025)
- Java Full Stack Development – Kelly Technologies (2024)
